Communication

Summary

Web Developer experienced with coding, debugging, and refactoring, seeking career in development. Graduated from State College of Florida, in 2018, with a focus of Computer Science and Mathematics. Passionate about coding and problem solving.

Experience

WeatherVue App

github.com/garrettHensley/WeatherVue

This app was created as a 5-day weather forecast for a specified location. Wrapped elegantly with bootstrap and custom styles, while utilizing Open Weather API to get weather data.

Uses axios to access weather API, and VueJS to neatly display data with DRY principles in mind.

Real Estate App

github.com/garrettHensley/real-estate

A real estate template web app, built with VueJS and Bootstrap. Utilizes Random User Generator API, to display fictional real estate agents and their information.

Uses VueJS and axios to gather and display agent information, and dynamically displays agent profiles.

Vue Todo

github.com/garrettHensley/vue-todo-2

A fully functional CRUD(create, read, update, delete) web app, created with Vue and Bootstrap. Allows the user to add items to a todo list, edit, and delete them. This app also features a completed list, for tasks finished.

Education

State College of Florida

2016-

Associates Degree

Computer Science/Mathematics
